Location

Our Viking Experience UK is located in the heart of the historic town of York, just a short walk from the city walls. The site is a former Viking longhouse, which has been carefully restored to provide an authentic experience. The building is made of stone and has a thatched roof, which is a rare sight in the city. The interior is furnished with period-appropriate items, including longbenches, a hearth, and a large hall. The site is surrounded by a moat, which is a remnant of the original Viking settlement. The moat is filled with water, and there are several small bridges crossing it. The site is a great place to learn about the lives of the Vikings and to experience the culture in a unique way.
